

TO OUR HONORED DEAD

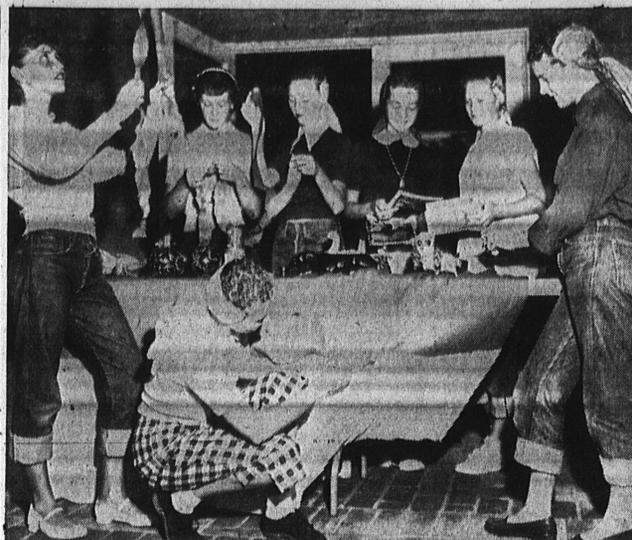

They have not died in vain! Today is the day to remember Lexington, Gettysburg, Santiago Bay, Chateau Thierry, Coral Sea, and Okinawa. As They bravely died, so we must bravely live. God has a destiny for America, and only eyes of faith can read that destiny. Each drop of blood spilled from Bunker Hill to Iwo Jima, is a deposit in the bank of our country. One hundred fifty million Americans can do no less than dedicate ourselves anew. With our Alabaster Ointment of thankfulness, let us nobly remember those who laid themselves between our country and her foes... those who paid the last full measure.—IN MEMORIAM

"Peak demand" tells how much capacity we need!

"Generating capacity" isn't like warehouse capacity, where products can be stored and withdrawn as the need arises. Electricity can't be stored, so our capacity must be enough to make all the electricity that might be needed on our lines at any given moment. We keep records on that "peak demand" moment each year. In 1951 it was on October 24th—1,559,500 kilowatts. Over the past five years, each "peak" has been higher than the year before, by an average of 95,000 kilowatts. Still more important is the fact that we've kept ahead of peak demand—but it has cost us an average of one million dollars a month for more generating facilities alone.
